 [Portfolio](#)

Detail-oriented Data Analyst skilled in Python, SQL, Power BI, and Excel, with expertise in data cleaning, statistical analysis, EDA, ETL processes, and feature engineering. Proficient in data visualization tools like Matplotlib, Seaborn, and Power BI to create actionable insights. Experienced in using BeautifulSoup for web scraping to extract data and cleaning dirty data from various sources. Capable of building data lakes to integrate and manage large datasets. Strong problem-solving abilities, leveraging data-driven solutions to drive business decisions and optimize processes across various industries.

Internship

Data Analyst, PwC Certificate

- Enhanced Power BI skills by creating dashboards to visualize KPIs and meet client needs.
- Analyzed HR data, focusing on gender-related KPIs, and provided recommendations for gender balance at the executive level.
- Delivered actionable insights and recommendations to stakeholders through clear communication.
- Gained expertise in data visualization, KPI definition, and data-driven decision-making.
- Key Skills: Power BI, Data Visualization, KPI Definition, Problem-Solving, Communication, Excel

Dec 2024

Data Analyst, Goldman Sachs Certificate

- Proficient in Excel for data cleansing, manipulation, and advanced functions, including conditional formatting.
- Developed VBA macros to automate tasks and enhance efficiency with account sales data.
- Created interactive dashboards and visualizations using Excel and PowerPoint for effective data storytelling.
- Applied financial modeling techniques in cash flow, forecasting, and income statement analysis.
- Key Skills: Excel, VBA, Data Analysis, Data Visualization, Financial Forecasting, Macros, PowerPoint

Dec 2024

Education

Visvesvaraya Technological University

- Bachelor of Engineering, Civil Engineering
- CGPA: 8.4

Aug 2020

Amity University

- Masters of Science, Data Science
- CGPA: 9.01

Aug 2024

Projects

- Mobile Store Sales Analysis : Analyse mobile sales data to track performance and identify trends for business improvement.
- Telecom Customer Churn Analysis: Predicts customer churn and identifies retention strategies.
- Call Centre Data Analysis : Evaluates call centre performance and customer satisfaction.
- Diversity and Inclusion Analysis: Analyse gender diversity and workforce metrics to support HR strategies.
- Road Accident Analysis: Analyse road accident data for improved safety and decision-making.

Skills

- Python (Matplotlib, Seaborn, Numpy, Pandas)
 - Power BI
 - Excel
 - SQL
- Machine Learning
 - EDA & ETL
 - Data Cleaning & Data Warehouse
 - Eye for Detail & Time Management

Certification

- IBM Databases and SQL for Data Science with Python from Coursera
 - IBM Data Analysis Course with Python
 - CS50'S Introduction to Programming with Python from Harvard University
- Jul 2023

Jul 2023

Sept 2024
